PRESS RELEASE

Shield Advanced Solutions (Canada) Ltd – *where technology matters!*
Toronto, Ontario

Issued: 14 January, 2008
Immediate Release

Product Announcement – Receiver Apply Program (RAP) V2.1

Toronto, Ontario – Shield Advanced Solutions announces Version 2.1 of their Receiver Apply Program (RAP).

RAP utilizes the best IBM technology to its advantage, resulting in an efficient, affordable solution for data protection and disaster recovery for the i5. Aimed primarily for SMB market, RAP is robust enough for use within any size of organization.

New features in RAP V2.1 include:

- Full support for Version 5.3 i5OS
- Improved Object and profile replication
- Data repair during Data auditing

This latest level interacts directly with Shield's JobQGenie product, the only solution for the replication of Job Queue data to the remote system.

RAP can be installed and configured in less than one day.

Pricing: Base module \$5000, Option 1 module (Object & Profile replication & Auditing) \$2500.

Free 30-day, no-hassle software trial available.

The trial installation allows immediate use, without security key.

For product literature and more information visit www.shield.on.ca.

Shield Advanced Solutions (Canada) Ltd is an IBM Advanced Business Partner.
